

ACMO

Description

CAS No.: [5117-12-4] 4-Acryloylmorpholine

ACMO is an active Acrylamide monomer which is low odor. In terms of UV curing, ACMO has the advantages of fast curing speed, good dilution, low volume shrinkage, excellent heat resistance and low toxicity. It is especially recommended to use in inks, coating products, sealants, adhesives.

Molecular formula: $C_7H_{11}NO_2$

MW:141.168

Physical Properties

Appearance:	Colorless or light yellow clear liquid	Purity:	≥98.0%
Melting Range:	-8°C(101.3kPa)	Density:	1.12 g/cm ³ (20°C)
Decomposition temperature:	158°C	Flash point:	126.5°C(1013hPa)

Packaging and Handling

Packaging: 25Kg, 200Kg/Drum, 800Kg/Pallet or on request.

Store the product in a cool, dry, well-ventilated area. Avoid contact with skin and eyes. For additional handling and toxicological information, consult the Material Safety Data Sheet.
